Dual-Sided Cutting Board

Twice the surface with half the hassle, **AR+COOK's** Dual-Sided Cutting Boards feature two cutting surfaces – bamboo and polypropylene – that allow users to designate one side for meat and the other for vegetables, to lessen cross-contamination. The bamboo surface, a resilient and sustainable material, is bonded with a food-safe, U.S. certified formaldehyde-free adhesive with no dyes or stains. The durable polypropylene cutting surface is odor resistant and keeps knives sharp while resisting deep scratches. In order to prevent slippage, **AR+COOK** placed silicone feet on both sides of the board. Cutting boards are available in lengths of 17.5" and 11.75". The large size features a visual chopping guide ranging from mince to large-dice and julienne. The zinc collection's version is available in pink, purple, green or orange with a suggested retail price of \$40 for the larger board and \$30 for the mini size. The titanium collection's version is available in black or white with a suggested retail price of \$50 for the larger size and \$39 for the mini size.
